

ALIBAVA

S Y S T E M S

Very Low Absorption

Beam Intensity & Position Systems

Vacuum configuration

Standard configuration

Picoammeter

Single and 4 quadrants systems to perform **intensity** and **position** measurements.

Vacuum (KF 40), **Standard** (light shielded housing) and **Naked** (custom integration) configurations.

Picoammeter especially suited for applications where multi-channel **fast acquisition** is a concern, i.e. **feedback systems**.
